We are here to serve the health and wellness needs of Black communities

Mission

OurHealth, LLC's mission is to provide evidence-based, consumer-centered and culturally relevant health education and health media services for Black communities. The company uniquely focuses on the motivations, perceptions and behaviors which result in health decisions and ultimately affect the health status of Black communities.

OurHealth is owned and operated by African-American female health professionals. Coming together through the venture of social entrepreneurship, the OurHealth founders have merged their talents and skills in the fields of public health, internal medicine, clinical research, education, sexuality and mental health.

Services

Services provided by OurHealth, LLC include:

- Health curriculum design and development
- Health media and message development
- Assistance with planning qualitative and ethnographic research
- Policy brief review and development
- Keynote speaking
- Workshop facilitation
- Community and staff trainings

Sometimes it takes a village... and OurHealth looks to create the informed village needed to improve our community's health

Clientele

Consulting services are provided to non-profits, local, private and state funded coalitions, government agencies, and others interested in improving the health of Black communities and eliminating health disparities.
